SUMMARY

Senior Frontend Engineer with 7 years of experience building scalable React and TypeScript applications across enterprise, SaaS, and real-time systems. Focused on frontend architecture and bringing structure to large, evolving codebases. Experienced in microfrontends and complex applications, with a strong ability to deliver in both startup and large-scale environments. Strong full-stack background with Node.js, enabling effective collaboration across frontend and backend teams and end-to-end delivery.

CORE SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript (ES6+)
- **State Management & UI:** Redux, Zustand, Material UI (MUI), CSS/SCSS
- **Testing & Code Quality:** Jest, Vitest, Cypress, ESLint, Husky, Prettier
- **Architecture & API:** SPA/SSR/SSG, Microfrontends, WebSockets, REST API
- **Build & Tooling:** Vite, Webpack, Rollup, Docker, Nginx, Git, Unix
- **Backend:** Node.js, Express, NestJS, MongoDB

WORK EXPERIENCE

EPAM

Georgia, Tbilisi
May 2024 - Apr 2026

Lead Software Engineer

Worked on a large-scale international job marketplace platform based on a React microfrontend architecture, driving authentication unification across frontend applications and supporting services

- Led migration of authentication across ~20 React microfrontends, replacing fragmented legacy flows with a unified platform-wide approach
- Designed and implemented shared TypeScript authentication packages to support adoption across independently owned frontend applications
- Adapted migration strategy to different codebases, state management solutions, and tooling setups to enable incremental integration
- Planned and executed a staged rollout across interconnected microfrontends, coordinating cross-repository dependencies and minimizing integration risk
- Worked on profile-related frontend systems, standardizing profile flows across 20+ international platforms

Stack: React, TypeScript, Redux, Webpack, Vite, Node.js, NestJS, Express, RxJS

2MR LABS

Singapore
Sep 2022 - Aug 2023

Lead Developer

Joined an early-stage startup as the sole engineer, rapidly turning experimental product ideas into working applications

- Transformed loosely defined product ideas into React-based applications and internal tools under rapidly changing requirements

- Delivered functional MVPs within very short timelines, accelerating product iteration through rapid prototyping
- Built reusable CMS tooling and dynamic landing page systems to support content management across multiple projects
- Owned end-to-end implementation across frontend, backend, integrations, and deployment as the primary engineer

Stack: React, TypeScript, SCSS, Rollup, web3.js, Node.js, Express, MongoDB, Solidity

NIFTY HANDS

Singapore
Jan 2022 - Sep 2022

Lead Developer, Co-Founder

Co-founded and built a real-time multiplayer web game from concept to production as the sole engineer, featuring a blockchain-based in-game economy

- Developed a complex React client for a real-time multiplayer game, covering onboarding, matchmaking, and gameplay systems
- Implemented real-time UI updates using WebSockets, synchronizing client state and 3D animations with server-side gameplay events
- Designed and implemented resilient reconnect and client state restoration flows, allowing players to seamlessly resume active sessions after connection loss
- Built blockchain-based in-game economy systems, providing transparent ownership and transfer of player assets

Stack: React, Three.js, TypeScript, SCSS, Node.js, Express, MongoDB, Solidity, web3.js, WebSockets

MULLENLOWE SINGAPORE

Singapore, Remote
Oct 2021 - Jan 2022

Project Lead Developer

Worked as a lead developer on interactive TypeScript-based Decentraland experiences involving custom 3D assets, backend services, and blockchain integrations

Stack: TypeScript, Solidity, web3.js, Node.js, Express, MongoDB

MIRUM AGENCY

UAE, Remote
Dec 2020 - Oct 2021

Frontend Developer

Developed React-based frontend systems for a large-scale banking web application with complex form-heavy user flows and REST API integration

Stack: React, JavaScript, SCSS, CSS, Material UI (MUI)

FLOWSTER

Canada, Remote
Sep 2018 - Dec 2020

Full Stack Developer → Lead Frontend Developer

Joined a large workflow automation SaaS platform as a junior developer and progressed into a lead frontend role, focusing on frontend architecture, code quality, and user experience

- Modernized the frontend architecture by migrating the application to React hooks and functional components
- Transformed a legacy frontend into a structured component architecture, improving maintainability and making feature delivery more predictable
- Led a full frontend redesign in collaboration with a designer, improving UI consistency and overall user experience across the platform
- Established frontend development standards and guided the team in adopting consistent engineering practices and architectural patterns

Stack: React, JavaScript, SCSS, Material UI (MUI), Webpack, Node.js, Express, MongoDB
